

Product Discontinuation of GridVis Cloud

Dear Sir or Madam,

We would like to inform you about an upcoming change in our product portfolio that affects the GridVis Edition „GridVis Cloud“.

As part of our continuous portfolio optimization and to ensure long-term product availability, reliability, and technological relevance, the GridVis Edition „GridVis Cloud“ will be discontinued. This decision is based on ongoing technical development.

Product Discontinuation Timeline

Please note the following key dates:

Last order: 30.06.2026

Last delivery: 15.07.2026

End of standard support: 31.12.2026

Once standard support expires, Janitza will no longer provide regular technical support or updates outside of the applicable SLA. Warranty obligations for projects licensed prior to this date will, of course, continue to be fulfilled in accordance with the terms of the agreement. However, no new software features or non-critical bug fixes will be released.

Migration Recommendation

To ensure continuity and future-proof system planning, we recommend the GridVis Editions „Standard“ and „Expert“ as the successor to the GridVis Edition „GridVis Cloud“.

Your benefits with the GridVis Editions „Standard“ and „Expert“

- Fully customizable dashboards and reports
- Integrated device management for configuring devices
- Extensive additional features for energy management in accordance with ISO 50001

Our sales staff and solution partners are available to answer technical questions or advise you on alternative devices.

Kind regards,

Michael Kadziela
Managing Director
