Product Discontinuation of the UMG 96RM-E

Dear Sir or Madam,

We would like to inform you about an upcoming change in our product portfolio that affects the UMG 96RM-E.

As part of our ongoing portfolio development, the **UMG 96RM-E** is being discontinued. With this step, we are consistently aligning our portfolio with long-term availability, technological advancement, and future-proof system solutions.

Product Discontinuation Timeline - Please note the following key dates:

Last order: **31 August 2027**

Last delivery: **30 November 2027**

End of standard support: **30 November 2028**

After the standard support period expires, Janitza will no longer provide regular technical support, firmware updates, or repairs for the affected device. Warranty obligations for devices delivered prior to this date will, of course, be fulfilled in accordance with the terms of the contract. New software features and non-security-critical bug fixes will no longer be released after this date.

Migration Recommendation

For many common applications, the **UMG 96-PQ-L**, in combination with the **96-RCM-E module**, offers you a powerful and proven alternative from our current product portfolio.

The Benefits of the UMG 96 PQ-L at a glance

- Complete power quality transparency at every level
- Residual current measurement and temperature monitoring via the module
- Intuitive operation buttons on the color graphic display

Our sales staff and solution partners are available to answer technical questions or advise you on alternative devices.

Kind regards,

ppa. Thomas Hilbig
Vice President Product Management

		52.32.010	Modul 96-RCM-E

UMG 96-PQ-L

BASIC DATA

- 600 V CAT III
- Use in IT networks (Variants)
- Storage depth up to 15 years
- Phasor diagram on the display

POWER QUALITY

- Harmonics current up to the 65th harmonic
- High sampling rate with 280 sampling points per full wave
- 20 ms RMS value memory
- Full-wave events

COMMUNICATION

- Modbus Client/Server gateway functionality
- Gateway function
- Ethernet interface
- RS485

Modul 96-RCM-E

TECHNICAL DETAILS

- Residual current measurement
- Neutral conductor measurement
- DC power measurement
- Temperature measurement with monitoring
- Ethernet interface and Modbus gateway
